HIV Treatment

HIV Drug Assistance Programs

Are you uninsured? If you do have health coverage, are your prescription co-pays or other co-insurance costs prohibitively expensive? Or does your health plan come with high medication deductibles that you can’t afford? Help may be available from the following:

Cost-sharing Assistant Programs (CAPs)
Patient Assistance Programs (PAPs)
AIDS Drug Assistance Program (ADAP)
Medicaid

Different assistance programs have different eligibility criteria based on the federal poverty level (FPL). Eligibility for this year is based on last year’s income. The figure is adjusted based on family or household size. A complete table is available here. Unless otherwise stated, companies ask for verification of income, usually in the form of a federal income tax return. Companies also generally consider household income, meaning that a married couple that files joint taxes will be judged on their combined income. People who file individual income tax returns will only have their individual income considered. In many cases, if you are told you are ineligible for assistance, you can appeal to have the decision reversed.

COST-SHARING ASSISTANCE PROGRAMS (CAPs)

These programs offer cost-sharing assistance (including deductibles, co-payments and co-insurance costs) to people with private health insurance to obtain HIV drugs at the pharmacy.

Tivicay has a $5,000 per year/per individual maximum. Lexiva, Rescriptor, Selzentry, Retrovir, Ziagen, Trizivir and Viracept have a $4,800 per year/per individual maximum.

**PATIENT ASSISTANT PROGRAMS (PAPs)**

Patient Assistance Programs (PAPs) offer free or low-cost HIV medications to people who do not qualify for any other insurance or assistance programs such as Medicaid, Medicare, or AIDS Drug Assistance Programs (ADAPs).

In 2012, the Department of Health and Human Services (DHHS), along with seven pharmaceutical companies, the National Alliance of State and Territorial AIDS Directors (NASTAD), and community stakeholders developed a common patient assistance program application that can be used by both providers and patients. Before, patients and advocates had to fill out different sets of paperwork for each company; the new application should help simplify this process, however the form still has to be sent to each company program you are applying to for assistance. Click here for the form.

**HarborPath** is a non-profit organization that helps uninsured individuals living with HIV/AIDS gain access to brand-name prescription medicines at no cost, by providing case managers with a single “one-stop shopping” online portal for PAP applications and medication fulfillment through a mail-order pharmacy.

---

**AbbVie**

MEDICAID

Medicaid is a critical source of coverage of people living with HIV. Currently you can qualify for Medicaid if you have a low income and are part of a “categorically eligible” group (children, parents with dependent children, pregnant women, and people with disabilities). Each state establishes and administers their own Medicaid program but they are all required to cover certain mandatory benefits. Under the ACA, states have the option of expanding Medicaid eligibility to include people below certain income levels. You can apply for and enroll in Medicaid at any time. Here’s info on how to find out more about Medicaid options in your state:

Looking for drug assistance programs for viral hepatitis? Please visit [hepmag.com](http://hepmag.com).

The CAP and PAP information on this page is based on a document originally produced by the Fair Pricing Coalition, an ad hoc group of activists who advocate with the pharmaceutical industry regarding the price and patient access to HIV and viral hepatitis drugs. For more information, please visit [www.fairpricingcoalition.org](http://www.fairpricingcoalition.org).
